Name: _____ Date: _____ Score: _____ / 10

1.

IT TAKES MORE THAN MEDICINE

If one were to look at the **roster** of physical handicaps, one would reach the somber conclusion that the list is a long one. Included would be **stunted** development of an arm or leg due to a birth anomaly. Others would be the result of a crippling disease that has caused muscles to **atrophy**. The list would go on with illnesses and injuries that **maim** and debilitate. Modern medicine has done much to **ameliorate** the physical problems. However, there are an inordinate number of problems of the handicapped that have still to be alleviated. People are not naturally callous, but in some perverse way they have the propensity to repress any concern with the physically handicapped. The social problems seem to be inherent in our own attitudes.

Sample Sentences: Use the new words in these sentences.

If you heap opprobrium on an impious child, it probably will not _____ the conditions that led to the rebelliousness.

A) stunt **B)** maim
